

MONICA ELAINA KINGSLEY

Engineering Leader | Generative & Agentic AI • Platform & Product Engineering

India (Open to Global Relocation) • monica.elaina@gmail.com • (+91) 98847-53498 • [LINKEDIN](#)

Engineering leader with **13+ years** of experience scaling AI-driven, distributed full-stack product platforms across global SaaS and high-growth startup environments. Led a multi-layered organization of **40+ engineers (engineering managers and individual contributors)** across **Generative & Agentic AI, Platform, and Mobile** domains, translating business strategy into scalable systems while strengthening leadership depth and engineering rigor.

PROFESSIONAL EXPERIENCE

Senior Software Engineering Manager, AI & Platform Engineering

G-P/GLOBALIZATION PARTNERS, (Remote), Bangalore, KA, India | Feb 2022 – Present

- Established and led the **Global Compliance** and **Shared Services verticals**, owning a portfolio of platform services. **Scaled the organization** from **0 to 40+ engineers** across five teams, architecting a multi-layered structure of engineering managers and individual contributors, including contractors, while recruiting globally and building a diverse, cross-cultural engineering organization to support complex, distributed platform systems.
- Led **AI modernization** of a global compliance platform **spanning 45+ countries**, architecting agentic workflows and RAG-based systems integrating LLMs with internal knowledge bases, APIs, and rule engines. Built pinecone-backed retrieval pipelines and evaluation frameworks, **reducing time-to-compliance by 30%** through intelligent automation.
- Drove **AI-enabled SDLC (AIDLC)** transformation by building **agentic tooling** for automated code reviews, sprint reporting intelligence, and engineering process governance. Developed a **SCORP-aligned agent** framework to institutionalize AI-driven workflows across platform teams.
- Designed and scaled the **compliance-as-a-service platform** powering core EOR workflows such as onboarding and benefits, **reducing human-in-the-loop effort by 60% across 17 countries** and enabling standardized global expansion.
- Architected and scaled the **shared services platform** layer including UI Platform, Notification Service, Agreement and Action Items Services, Compliance and Policy Assistants, and Document Management Platform, consolidating duplicate implementations into **reusable capabilities**. Achieved **99.99% uptime** across services supporting operations in **90+ countries** while **reducing long-term maintenance overhead by 80%**.
- Established and operationalized **platform on-call and incident management** frameworks, strengthening reliability ownership and response maturity across distributed teams. Partnered cross-functionally with product, customer success, and globally distributed engineering teams to drive execution.

Software Engineering Manager, Fullstack Product Engineering (Backend & Mobile)

SHARECHAT, Mohalla Tech Pvt Ltd, Bangalore, KA, India | Dec 2021 – Jan 2022

- Led the **Livestream engineering vertical across ShareChat and Moj**, supporting **160M+ MAUs** with real-time distributed systems engineered for scalability and reliability.
- Managed multiple cross-functional teams across Android, iOS, Node.js backend services, and QA, overseeing **30+ engineers** while driving architectural rigor and delivery governance across both platforms.
- Drove **cross-platform architecture across Android, iOS, Node.js services, and React-based gamification components**, ensuring cohesive mobile-backend integration and system consistency across both apps.
- Built **experimentation infrastructure** leveraging feature flagging and cohort-based A/B testing to enable controlled rollouts and data-driven optimization of high-traffic features.

Tech Lead Manager, Fullstack Product Engineering (Backend, Web & Mobile)

BYJU'S, Think & Learn Pvt Ltd, Bangalore, KA, India | Jan 2021 – Dec 2021

- Led a **30-member cross-functional engineering** organization across Android, iOS, backend, and QA, owning architecture and delivery of large-scale mobile learning platforms. Served as **Scrum Master** and institutionalized **Agile practices** to improve delivery predictability and execution velocity.
- Partnered closely with product, user research, and customer-facing stakeholders to translate learner insights into scalable technical solutions, while establishing engineering governance standards that improved stability, quality, and long-term maintainability.

Lead Software Engineer, Fullstack Product Engineering (Backend & Mobile)

FRESHWORKS TECHNOLOGIES, Chennai, TN, India | Jun 2016 – Jan 2021

- Architected and delivered **enterprise-grade microservices** for Quality Management System within the Freshdesk platform, leveraging Spring Boot, Kafka, Kubernetes, and AWS to ensure scalability, security, and low-latency performance. Drove **98%+ automated test coverage** through TDD and CI/CD practices while standardizing microservice governance across teams.
- Led **cross-product mobile engineering** initiatives using Java and Kotlin for Android, building and launching applications across Freshdesk, Freshservice, and Freshchat, and introduced a reusable Golang-based middleware layer to accelerate multi-product development and shared business logic reuse.

Senior Software Engineer, Mobile Engineering (React Native, Android & iOS)

Q-BURST TECHNOLOGIES, Chennai, TN, India | Nov 2015 – May 2016

- Led rapid development of **client-facing mobile proof-of-concept** applications across Android and React Native, directly contributing to new customer acquisitions.

Software Engineer, Mobile Engineering (Android Native)

RENAULT NISSAN TECHNOLOGY & BUSINESS CENTER, Chennai, TN, India | Dec 2012 – Nov 2015

- Contributed to the Android-based R-Link infotainment platform supporting **200+ in-car applications**, co-developing a custom framework integrating vehicle APIs and embedded systems capabilities.
- Served as **Squad Lead and Scrum Master**, driving Agile execution; recognized with the **Silver Star Award** for engineering excellence.

SKILL SET

- **Leadership & Strategy:** Org Scaling, Technical & Product Roadmapping, Strategic Planning, Agile Methodologies & Scrum Master, Stakeholder Management, Global Team Leadership, Startup Engineering Leadership
- **Engineering:** Microservices & Event-Driven Architecture, Serverless, Cloud-Native (AWS), Kubernetes, Docker, SQL & NoSQL, Platform Engineering, Generative & Agentic AI, RAG Architectures, LLM Integration, Pinecone, Java, Kotlin, Golang, Python, Node.js, Spring Boot, Kafka, TypeScript, GraphQL, Android, iOS, React/React Native, Android, iOS

EDUCATION

- **ANNA UNIVERSITY, CHENNAI, St. Joseph's College of Engineering** | 2008 – 2012
Bachelor of Engineering (BE) in Computer Science and Engineering, First Class (CGPA: 7.71/10.0)
- **ALLIANCE FRANÇAISE, CHENNAI**
DELFI A1, French (79.50%)
