

SHYAMLEE BHAMBORE

SENIOR ENGINEERING LEADER, PLATFORM & UI/UX, GCC and DIGITAL TRANSFORMATION

Strategic technology leader, focused on driving growth and customer satisfaction in alignment with organization's business goals. Skilled in Embedded Systems, Platform Engineering (Server & Network – Enterprise Platform & Architecture), UI/UX & (Web) Application SDLC in Avionics/Automotive/Aerospace Mission Critical Systems and in Airport Connected Security Screening & Threat Detection CT systems. Digitization of Electrical and Electromechanical Systems. Effective Energetic people developer, Excellent Communicator, Negotiator; Empathetic and Humble leader.

🏠 Bangalore, Karnataka - India

👤 CORE COMPETENCIES & LEADERSHIP IMPACT

- **Led 35+ engineers across global teams** (India, China, Czech Republic) in areas of Software Systems, Platform Engineering, UI/UX Design & Product Life Cycle Management across Aerospace & Security Screening & Threat Detection industries.
- **Key Enabler in successful GCC setup, scaling teams from 4-55 engineers** for my verticals and setting up IT infrastructure (Dev Ops, CI/CD, Cloud infra).
- **Managed and owned financial forecasting and accountability** for my verticals, **CAPEX and OPEX planning for \$80M budget**.
- Process improvement via **LEAN VSM to improve time to deploy by 30%**, adept at **Agile**, and **Six Sigma** principles to enhance **delivery efficiency, engineering quality, and customer satisfaction**.
- Proven success in driving **technology strategy / roadmap (Platform and UI/UX) aligned with business goals**, leading to **30% cycle time reduction** & executing **digital engineering transformation** initiatives aligned with long-term **business growth objectives**. Customer POCs and successful NPIs into the world market.
- Skilled in various **estimation techniques** and project **roadmap planning** with multiple cross functional dependencies including non-engineering teams like Dev Ops, Product and Program Management.
- Defining and tracking **key performance OKR metrics (DORA, predictability, quality & schedule metrics)**
- Delivered **scalable, secure, & compliant solutions** adhering to global standards including **DO-178C, ISO 27001, AS9100D, & CMMi Level 5**.
- Recognized for **visionary leadership, strategic execution, and cross-functional collaboration** across **matrixed global teams in USA, Germany, UK, Czech Republic and China**.
- Skilled in **Program & Portfolio Management, Customer Success, Risk Mitigation, Stakeholder Engagement & Stakeholder Communication & Operational Excellence** for **multi-million-dollar global programs**.
- A **transformational people leader**, passionate about **mentorship, talent development, and succession planning**, with a consistent record of building **high-performing, innovation-driven teams**.
- Experienced in **Cybersecurity, AI/ML-driven automation, and cloud-enabled distributed systems**, with a strong focus on **innovation, regulatory compliance, and strategic technology modernization** with focus on **Built in Quality**.
- Known for fostering **collaborative ecosystems, promoting technical excellence, and creating sustainable value** through **strategic leadership and executional rigor and fostering innovation culture through LEAN Kaizens and driving Hackathons**.
- Inputs to RFPs and **tender requirements analysis** for technical robustness and completeness.

👤 NOTABLE ACCOMPLISHMENTS ACROSS CAREER

- **Pioneered Highly Scalable, Unified Platform MVP** at Smiths Detection to unify all product verticals—**Aviation, Seaports, Borders, and Defense**—resulting in a **highly scalable and customer-approved solution** now progressing toward full productization.
- **Guided AI/ML model development** leveraging CT image datasets from global airports, enabling **automated detection of emerging threats** and strengthening Smiths Detection's AI-driven product roadmap.
- **Facilitated strategic meetings with Indian government officials from BCAS (Bureau of Civil Aviation Securities)** for enhanced Xray and checkpoints features for Indian airports with an aim to help establish Indian Regulatory body.
- **Spearheaded Smiths Detection's first global Hackathon**, transforming it into a **yearly innovation event** that fosters creativity and technical exchange across international teams.
- **Led a cross-functional team** delivering **high-speed satellite internet connectivity via SpaceX's Starlink constellation**, enabling enhanced SATCOM (satellite communication) for Collins aerospace systems.
- **Mentored and directed Honeywell's Avionics Common Platforms solution** from **TRL 2 to TRL 4**, driving advancements across **Air Transport, Business, and Regional Jets**, including NASA's **Orion Pathfinder** application.
- **Airbus A380's end to end first certification from Requirements writing to delivery** (Flight Management System HMI), a milestone achievement in Honeywell's avionics history. This software was powering completely new hardware.

🎓 RECOGNITIONS

- **Team Excellence Award** for **Boeing B787 OHMF (Onboard Health Monitoring Function) development**.
- **Partner Award** for accelerated delivery of **PV10 Bi-Directional (Tx/Rx) Scheduler**.
- **Nominated for the annual Leadership Award** at Collins Aerospace for exemplary contribution to organizational and people excellence.
- First runner ups for Smiths Excellence Awards for **"Savings Through Innovations"** achieved **savings of Euro 850K** against target Euro 1000K

- Recognized as a **LEAN Facilitator for Detection India**, successfully embedding **LEAN methodologies** into digital engineering practices.
- **2 times Six Sigma Green Belt Certified** for demonstrated excellence in process improvement.

EDUCATION

- Bachelor of Engineering (B.E.) – Computer Science | *BMS College of Engineering, Bangalore, 2000 batch*

CERTIFICATIONS AND TRAININGS

Certifications & Professional Training:

- Project Management Professional (PMP) – Honeywell In-House Certification
- Rockwell Collins LEAD2 Senior Leadership Certification
- SAFe Agilist Certification.
- Honeywell Design for Six Sigma (DFSS) Certification
- Integrated Project Management Certification
- Six Sigma Green Belt Certified
- LEAN Facilitator – Detection India.
- Leadership and Management Workshops
- Soft Skills and Business Communication Trainings – Online and Classroom

TECHNICAL SKILLS

- **Programming Languages & Frameworks:** C++ (Full Stack – Front end and Back end) | Java (Full Stack) | Python | C | Ada | ReactJS | NodeJS | Angular | Core Java
- **Operating Systems & Real-Time Platforms (RTOS) for distributed systems:** Deos™ | VxWorks | RC Linux | FreeRTOS | Linux,
- **Requirements decomposition** from tender/technical spec, HLD, LLD, Development, Unit Testing and Integration using VMs and inhouse built simulators.
- **Requirements Management Tools:** IBM DOORS, TeamCenter, Atlassian JIRA and Confluence.
- **Configuration Management & Version Control:** ACM (Automated Configuration Management – VAX/VMS) | CM21 | ClearCase | ClearQuest | Dimensions | SVN | GIT / GitLab | GITHUB
- **Cloud, AI & Automation Tools:** Microsoft Azure Cloud Deployments | AI/ML Modelling Frameworks (for Threat Detection) | CI/CD Pipelines | GitHub Copilot | Jelly Fish | ChatGPT (AI-based productivity integration)
- **Program & Project Management Tools:** Microsoft Project (MPP) | SAP | MS Excel (Macros) | MS PowerPoint | SharePoint | Visio
- **Standards & Compliance Frameworks:** DO-178B/C | ISO 27001 | AS9100D | CMMI Level 5 | FAA, EASA, TSA, BCAS, CAAC, ECAC
- **Protocols & Communication Interfaces:** ARINC (network and communication), CAN, MQTT, HTTPS, APIs
- **Requirements, Build & Continuous Integration (CICD) Tools:**
Atlassian Suite (*JIRA, Confluence, Bitbucket*), **DOORS**
- **GitHub** | **Jenkins** | **SonarQube** | **SonarLint** | **BlackDuck** (*3rd Party Software Management Tool*)
- **SW DFSS & Six Sigma Tools:** PMAP, TMAP, FMEA, SIPOC, VSM, 5S, SQDCP, RPS, RCCA, Visual Management
- **LEAN & Agile Tools:** SAFe, Scrum / Kanban Boards, Sprint Metrics

LINKEDIN PROFILE

<https://www.linkedin.com/in/shyamlee-bhambore-1a24a2ab>

TARGET ROLES

Director of Engineering
Head of Engineering
Head of Platform Engineering
Head of UI/UX Engineering
Senior Engineering Manager

EXPERIENCE

September 2020 | Smiths Detection, Bangalore | Senior Engineering Manager | OEM, Product based

Leading the **Digital Engineering division** for **Aviations Platform and UI/UX verticals**, driving end-to-end **software and systems development** for security screening and threat detection solutions and delivery to multiple major airports around the world.. Reporting to the Global Director (Netherlands) and collaborating across global centers of excellence in the **UK and Germany**.

Key Achievements:

- Successfully built and **scaled digital engineering** in Bangalore, enhancing global product delivery efficiency.
- Established **cross-site collaboration framework** with COEs, resulting in improved turnaround time and quality consistency.
- Championed **continuous improvement and automation initiatives and process improvement via VSM to positively impact the global Aviation process**, leading to measurable gains in **timely customer delivery and defect reduction**.

August 2017 - September 2020 | Collins Aerospace, Bangalore | Engineering Manager | Product based

Directed **software design and development** for **Communication Radios (HF, VHF, and SATCOM)** within the **Aerospace domain**. Reported to the Senior Engineering Manager in India and worked closely with US-based program teams.

Key Achievements:

- Reduced **project delivery cycle time** through agile transformation and improved workflow standardization.
- Successfully **mentored first-line technical leads**, developing leadership succession within the engineering team to deliver efficient communication datalink software for onboard Avionics including SATCOM Datalink for Starlinks constellation.
- Strengthened **collaboration with US counterparts**, improving project predictability and cross-site visibility.

June 2000 - August 2017 | Honeywell Aerospace | Product based Associate Engineering Manager (2 yr sabbatical after ML)

Led multiple high-value **aerospace software programs** spanning **Flight Management Systems (FMS)**, **Communication Radios**, and **Common Platform Software** for Airframes A320, A340, A380, Boeing 787 starting with internship.

Key Achievements:

- End to End SDLC Delivery of A380 HMI function within FAA defined quality criteria.
- Advanced Tech Unified Platform for Commercial, Business Jets and Space Vehicles (NASA collab).
- Successfully lead my team through CMMi Level3 to achieve CMMi Level5 Certification.
- Managed scope, schedule and budget as Senior Program Manager, lead multimillion dollar Business Jet programs to successful customer deliveries for Embraer/Hawker/Pilates customers.

PERSONAL DETAILS

Gender: Female | **Marital Status:** Married | **Languages:** English, Hindi, Marathi & Kannada | **Location:** Bangalore - Karnataka
