

RAMPRASAD SUBRAMANIAN

Engineering Executive – AI-First Product & Platform Development

Bengaluru, India • <http://linkedin.com/in/ramprasads>. Ph: 9739916624

EXECUTIVE SUMMARY

I lead engineering for Blackboard (200+ Organization), a Learning Management System used by more than one thousand universities and millions of students worldwide. Over twenty-three years I have built and scaled product engineering teams at SAP, Amazon, and Anthology, and in between I founded an EdTech startup that taught me what it means to build for learners, not just users.

CORE LEADERSHIP STRENGTHS

- Technology & Product Strategy for SaaS / EdTech platforms
- AI-First SDLC: AI-assisted development, quality, and operations
- Scaling Engineering Orgs (20 → 300+ engineers; multi-site, global)
- Org Design, Engineering Practices, Developer Experience and KPIs (OKRs, DORA, quality)
- Cloud-Native Platforms, Reliability, and Observability
- Talent Strategy: senior hiring, succession planning, leadership development, team expansion
- Technology environments worked - Java, React, Microservices, Python, Django, Spring
- Cloud Platforms – AWS, Azure, Self Hosted

PROFESSIONAL EXPERIENCE

Vice President, Product & Platform – EdTech (Blackboard Learn)

Blackboard (Anthology) – Bengaluru India

2021 – Present

- Enabled 1000 customers to move from legacy version to new Learning management system version based on modern React based User Interfaces with enhanced functional breadth over a period of 2 years. Increased ARR for the company through this transformation.
- Lead end-to-end engineering for a large-scale learning management system with responsibility spanning product development, quality engineering, and platform engineering
- Scaled engineering teams in 3 different locations from 4 teams to 20 teams in India alone while at the same time delivering on quality with multiple features delivered. Drive an AI-first engineering agenda, embedding AI into code, test, operations, and product workflows to improve developer experience, velocity, and quality.
- Partnered with product, design, and go-to-market leaders to define and execute the product roadmap for millions of learners and educators, balancing new feature delivery with

platform modernization and reliability. Improved usability score by 10% through this collaboration.

- Implement engineering metrics, practices and operating mechanisms (e.g., OKRs, DORA, reliability KPIs) to improve predictability, reduce incidents, and build board-level confidence in delivery.

Software Development Manager – Amazon

Amazon – Bengaluru India

2017– 2019

- Enabled access point feature deliveries in retail website to millions of access point users across 12 marketplaces.
- Led engineering teams in a high-scale, customer-obsessed environment, delivering critical microservices within Amazon’s global technology stack specifically within retail website.
- Raised the engineering bar through hiring, performance management, and mechanisms for design reviews, operational readiness, and post-incident learning.

Developer to Development Manager – SAP

SAP Labs India - Bengaluru

2003-2014

- Part of agile transformation coaching 10 to 15 teams at SAP Labs.
- Delivered on product roadmaps of SAP Master Data Management, Lifecycle Management and SAP NetWeaver middleware platform.
- Directed engineering teams building enterprise-grade software products and platforms within SAP’s portfolio.
- Drove improvements in software quality, release practices, and development tooling in collaboration with product management and customer-facing teams.

Experience Highlights

- Started a company named Wonder Sky from scratch in the year 2019 to 2021 and developed a mobile learning platform for K-12 schools with 3 different schools using it actively.
- Worked in both small and large companies scaling teams, diving deep into architecture and design and enabling CI/CD processes throughout my career.

EDUCATION

Masters in Information Technology – International Institute of Information Technology – Bengaluru.
