

RUMENA BOSE

Global Capability Centre Leader · Enterprise Transformation Leader

(+91) 8217261935 · mailrumenabose@gmail.com · LinkedIn · India

Transformational GCC leader with 15+ years of progressive experience building, scaling, and repositioning global capability centres as strategic enterprise growth engines. As a Founding Member of Merck Sharp & Dohme's Hyderabad Technology Hub, architected end-to-end GCC operationalization, establishing governance frameworks, SLA/SMA structures, cultural integration models, transition playbooks, and talent scaling strategies from a greenfield state. Brings a rare combination of site leadership, operational delivery excellence, and enterprise-wide transformation at scale. Experienced in designing multi-function GCC operating models and supporting capability transitions from global delivery environments across US, EMEA and APAC into India GCC platforms. Partnered with global leadership on workforce ramp strategy, operating budget alignment, and vendor ecosystem coordination during greenfield site establishment. Strong familiarity with India GCC talent-market dynamics and external partner landscape supporting scalable capability expansion.

Proven track record of driving multi-million-dollar value creation across large, matrixed multinationals, delivering \$10M in annualized cost savings at PepsiCo, 40% cost optimization and 40% performance improvement at SVB's India GCC, and 30% operational efficiency gains across multi-geography shared services. Expert in defining and governing SLA/SMA-driven multi-function shared-services platforms spanning Finance & Accounting, Supply Chain, HR Enablement, Technology, and Procurement across global delivery environments supporting US, EMEA and APAC stakeholders with rigorous performance dashboards, incident management disciplines, and continuous improvement cultures embedded across every engagement.

Recognized for outstanding stakeholder management at C-suite and executive committee level across the US, Europe, and APAC acting as the strategic interface between global headquarters and India operations, translating boardroom ambition into executable operational reality. Currently leading enterprise AI adoption implementation for 85,000+ employees globally, reinforcing a unique positioning as a GBS leader who combines operational delivery rigor with next-generation digital enablement and responsible AI governance.

IMPACT AT A GLANCE

\$10M+

Annualised savings delivered at PepsiCo via shared services optimization

40%

Cost optimization achieved at SVB India GCC through operating model redesign

85,000+

Employees supported globally across enterprise AI adoption strategy

2,500+

Employees impacted by Scaled Agile transformation across APAC & EMEA

45%

Improvement in cross-functional data accessibility via governance redesign

30%

Operational efficiency gain across multi-geography shared services delivery

\$1.8M

Measurable NPS & service quality value created through C-suite programs

32%

Improvement in migration participation through customer transition pathways

CORE COMPETENCIES

- | | |
|--|---|
| • GBS / GCC Site Leadership & Operationalization | • SLA / SMA Design, Governance & Performance Management |
| • Service Quality, KPIs & Continuous Improvement Culture | • Transitions, Migrations & Knowledge Transfer Programs |
| • Enterprise AI Adoption & Digital Enablement Strategy | • Multi-Function Shared Services Portfolio Management |

• Budget Governance	• C-Suite Stakeholder Management
• Organisation Design, Culture Architecture & Talent Scaling	• ServiceNow, Power Platform, Tableau & Automation Platforms
• Finance, Supply Chain, HR & Technology Service Integration	• Change Management, Adoption Frameworks & Champion Networks

CAREER EXPERIENCE

Associate Director — GCC Leadership Team | Merck Sharp & Dohme (MSD)

Apr 2025 – Present

GCC Site Operationalization · AI Adoption Leadership · Enterprise Governance · Talent Strategy

- Orchestrated end-to-end Phase I site setup for MSD's new Hyderabad Technology Hub — establishing the operational blueprint, governance framework, SLA/SMA structure, cultural integration model, and change management architecture during the critical inception phase, positioning the centre as a strategic enterprise capability engine from launch.
- As Chief of Staff to the Centre Head, supported operating model rollout, workforce ramp investment planning, transition prioritization sequencing, vendor ecosystem coordination and enterprise stakeholder alignment across global functional leaders in the US, EMEA and APAC during greenfield GCC scale-up.
- Partnered with external capability partners, consulting ecosystem and hiring agencies supporting workforce ramp planning, capability sequencing and operational readiness during greenfield GCC establishment phase.
- Supported operating budget planning, workforce investment prioritization and capability ramp sequencing aligned to Hyderabad GCC scale-up strategy in partnership with global GBS leadership.
- Leading enterprise AI adoption strategy and implementation for 85,000+ employees globally, partnering with consulting partners, and internal product/IT stakeholders to define rollout architecture, establish AI governance guardrails, and embed responsible AI change management across technology and business functions.
- Designed and governed the centre's cross-functional transition roadmap with tiers, delivery capability scaling, accelerating time-to-value for each newly transitioned workstream.
- Led capability transition sequencing aligned to migration of enterprise capabilities into the India GCC environment from distributed global delivery locations across US, EMEA and APAC, accelerating time-to-value and stabilizing early-stage operating maturity.
- Helped shape workforce scaling strategy aligned to India GCC talent-market dynamics, capability availability mapping and phased hiring sequencing supporting sustainable centre growth
- Established and operationalized an AI Innovation Studio to identify, prioritize, and scale high-value AI initiatives deploying intelligent agents, structuring intake pipelines, and accelerating adoption readiness across multiple concurrent transformation programs.
- Translated product strategy evolution into adoption-ready customer transition pathways, improving migration participation rates by 32% and reducing manual coordination effort through ADKAR-aligned toolkits and agentic solutions.
- Facilitated change forums and champion networks providing structured channels for sequencing change delivery, governing data change impacts, and managing product release communications across the enterprise product lifecycle.
- Established a cross-functional founding working group to co-create employee engagement frameworks, governance rhythms and culture strategy for the Hyderabad Technology Center, enabling proactive policy shaping and strengthening early employee ownership during GCC build phase.

Deputy Director — Strategy & Transformation | PepsiCo

Jul 2022 – Apr 2025

Enterprise Transformation · Supply Chain Optimization · C-Suite Partnership · Multi-Geography Operations

- Drove organization-wide transformation initiatives across global functions in a complex matrix environment, delivering a 25% improvement in Net Promoter Score (NPS) through service excellence programs and direct C-suite alignment — demonstrating the commercial impact of operational transformation on stakeholder and customer experience.
- Spearheaded supply chain optimization and automation initiatives across AMESA and EU regions — improving operational efficiency by 30% and delivering \$10M in annualized cost savings through scalable, standardized shared services delivery frameworks.
- Led Enterprise Service Management (ServiceNow) transformation in collaboration with global leaders — optimizing processes, identifying service whitespaces, designing content frameworks, and elevating operational efficiency by 45% while enhancing employee experience.
- Established governance rhythms and standardized operating playbooks across multi-function shared-services delivery portfolios supporting scalable GBS platform maturity across NA, AMESA and EU regions.

- Managed complex cross-functional stakeholder relationships across NA, EU and AMESA to design and deploy customer feedback mechanisms, realizing \$1.8M in measurable value and improving service quality by 25%.
- Supported AI-enabled Digital Twin transformation by coordinating cross-functional readiness, prioritizing operational intelligence use cases, and enabling adoption pathways for simulation-based supply chain optimization.

Senior Manager — GCC Transformation & Operations | Silicon Valley Bank (SVB)

Sep 2020 – Jul 2023

GCC Strategy · Operating Model Redesign · SLA / KPI Governance · Digital Innovation · Talent Development

- Developed and executed the target operating model and capability strategy for SVB's India GCC — achieving 40% cost optimization while simultaneously expanding service scope across banking and technology functions, a benchmark outcome in GCC efficiency.
- Defined, monitored, and continuously improved KPIs and SLAs in consultation with global functional teams, driving a 40% improvement in overall team performance through data-driven governance frameworks, structured accountability models, and performance dashboard tooling.
- Championed a digital-first GCC culture by implementing Power Platform and Tableau automation tools — significantly reducing manual effort, enhancing decision-support capabilities, and accelerating digital maturity across shared services functions.
- Led a team of 20+ in designing workforce capacity planning and capability-building strategies aligned with global business needs, strengthening leadership bench depth and elevating the centre's strategic contribution to the parent organization.
- Authored comprehensive digital playbooks and technical training modules for 60,000+ workforce, establishing repeatable knowledge transfer frameworks that accelerated onboarding and operational readiness during centre growth phases.

Manager — Agile Transformation & Org. Effectiveness | Amadeus

Aug 2017 – Sep 2020

Scaled Agile Transformation · Process Automation · Cross-Functional Alignment · Organisational Change

- Led a large-scale Scaled Agile (SAFe) transformation across APAC and EMEA, directly impacting 2,500+ employees and delivering a 30% improvement in cross-functional alignment — enabling faster, more collaborative delivery across business units and geographies.
- Implemented automation across supply chain and procurement processes, driving a 25% improvement in productivity and operational speed while strengthening digital adoption across matrixed organizational teams.
- Facilitated systemic change across complex, matrixed structures — breaking down functional silos, building collaborative delivery cultures, and enabling sustainable innovation across multiple geographies and business lines.

EARLY CAREER

Ernst & Young | 2016–2017

Team Lead – Digital Adoption & Process Transformation

Drove digital adoption for CPG sector clients; delivered 25% process efficiency uplift through targeted enterprise transformation programs.

Goldman Sachs | 2015–2016

Associate – Capability Development & Leadership Programs

Designed and deployed high-impact capability programs for 8,500+ employees including C-suite executives, scaling leadership readiness across a global financial institution.

HCL Technologies | 2011–2015

Senior Executive – L&D & Enterprise eCommerce Delivery

Established the Learning & Development function for a 25,000-employee business unit; supported enterprise eCommerce client delivery at scale.

EDUCATION

2023	Business Transformation & Strategic Leadership	Indian Institute of Management, Bangalore
2016	PGDM — Human Resources & Marketing	Alliance University
2011	Bachelor of Engineering — Information Science	Visvesvaraya Technological University

PROFESSIONAL CERTIFICATIONS & CREDENTIALS

- Prosci Change Management Practitioner
- Generative AI & Agentic AI – OpenAI Academy
- OKR Coach – Workboard
- Design Thinking – Stanford Online
- ESG & Climate Change – Wharton
- The Professional GBS Model – Inixia
- SAFe Program Consultant (SPC)
- Organisation Development – TISS
- Strategy & Sustainability – IESE Business School
- Diversity & Inclusion – Stanford University
