

Syed Shadab Hussain

Lead I - Engineering Design

Mob: 9482753818

Email: Syed.im2009@gmail.com

Summary

- Electrical Engineering professional with 12+ years of expertise in obsolescence management, cable harness design, and PCB development across electrical, electronic, and electro-mechanical domains.
- Proven track record in replacing obsolete components, ensuring lifecycle continuity, and driving new product development for global clients. Adept at cross-functional collaboration, BOM management, and compliance with environmental standards.

Technical Expertise

- PLM Tools: Team Centre, Windchill
- Design Tools: E3S -Basic, AutoCAD, ORCAD, Protel, P-Spice
- Obsolescence Tools: Silicon Expert, Z2Data, IHS, Octo part
- Testing: Card-level Testing, Multi-Meter
- Specialized: Cable Harness Design, Schematic Updates.
- Reverse Engineering

Core Competencies

- Obsolescence & Lifecycle Management
- BOM Management & Cost Optimization
- Cable Harness Design & PCB Development
- Schematic Update & Documentation
- Quality Assurance & Compliance (RoHS/REACH)
- Client Engagement & Technical Presentations
- Cross-Functional Team Collaboration

Skills:

- Core+
- Atom, SPS
- Nucleus, MM360, VSPI
- Smartsheet
- MS Office

Professional Experience

Lead I – Engineering Design I US Technologies, Bengaluru.

Mar 2024 – Present, Client: - **Applied Material**

- Managed end-to-end electronic / electrical component obsolescence across multiple product lines.
- Monitored lifecycle status (EOL, NRND, PCN, PDN) using Silicon Expert, Z2Data, IHS.
- Designed and modified complex electrical/electronic assemblies ensuring manufacturability and compliance.
- Evaluated and approved form-fit-function replacements, reducing supply risks.
- Participate in resolving customer complaints and escalations through root-cause analysis and corrective-preventive actions.
- Acted as subject matter expert for component lifecycle management and obsolescence best practices.
- Managed component obsolescence & ensuring long-term manufacturability and lifecycle continuity.
- Led BOM assessments and cost reduction initiatives.

Lead Engineer I HCL Technologies, Bengaluru.

Jan 2021 – Aug 2023, Client: - **Axcelis Technologies**

- Directed New Product Development (NPD) projects for Axcelis Technologies.
- Designed cable harness looms and executed component replacements.
- Oversaw BOM scrubbing, costing, and quality assurance.
- Executing comprehensive product life cycle management, including obsolescence management, PCN/PDN monitoring, and Form-Fit-Function validation for alternate component selections
- Conducting incoming inspections for both harness drawing modifications and new assemblies
- Ensured RoHS/REACH compliance through alternate component validation.

Senior Electrical Engineer I Alchemy Techsol India Pvt. Ltd, Bengaluru.

Oct 2018 – May 2020, Client: - **HCL Technologies**

- Designed and tested innovative electrical wiring systems and circuits.
- Conducted obsolescence risk assessments and implemented mitigation strategies.
- Collaborated with cross-functional teams for seamless product integration.

Production Engineer I Frauscher Rail Signalling System Pvt. Ltd, Mysore.

Jul 2017 – Oct 2018, Client: - **Indian Railway (RDSO), Indian Metro**

- Wired and routed panels and assemblies for rail signalling systems.
- Conducted system-level troubleshooting and testing.
- Hands on experience in assembling and wiring connection with component & system level and handling various laboratory equipment.
- Conducted Production-level documentation & supervision.

Engineer I SIKA Interplant System Ltd, Bengaluru.

Jul 2014 – May 2017, Client: - **NPOL, DRDO, HAL, ADA**

- Designed and developed GTR Cable Harness and Airborne Sonar Winch wiring systems.
- Designed & manufacturing documentation for cable harness assemblies.
- Conducted functional, vibration, and environmental testing.

Soft Skills:

- Collaboration
- Negotiation
- Inter-Departmental Coordination
- Relationship Management
- Reporting & Documentation
- Problem-Solving
- Decision Making
- Straight Forward Communication
- Adaptive
- Quick Learner

Achievements

- Worked as a Lead engineer for a technology upgrade and advancement in wiring concept and routing.
- Successfully replaced obsolete components across multiple product lines, ensuring uninterrupted production and lifecycle continuity.
- Led cable harness design and modification projects for global clients, delivering on-time and meeting IPC/quality standards.
- Improved product performance and customer satisfaction by implementing form-fit-function replacements that met electrical, electronic, and regulatory requirements.

Industry Experience

- Semiconductor Industry
- Locomotive Manufacturing Industry
- Aerospace & Defense Industry

Education

- Bachelor Program in Electronics & Telecommunication – Chhatrapati Shivaji Institute of Management & Technology (2018) (Certification Course)
- Diploma in Electronics & Communication – Netture Technical Training Foundation (2012)
- Pursuing BBA – University of Mysore

Personal Details:

Date of Birth: 2nd July 1993

Languages Known: English and Hindi

Professional Experience

Trainee Engineer I EMSAC Engineering Pvt. Ltd, Bengaluru.

Jun 2012 – Jun 2014, Client: - SIKA Interplant System Ltd.

- Overhauled winch, rescue hoists and slip rings, ensuring operational reliability.
- Conducted onsite cable testing and maintenance activities.

Project Overview

Led multiple high-impact engineering projects across industries.

Component obsolescence management where I replaced obsolete components to ensure lifecycle continuity and reduce BOM costs.

I directed new product development for semiconductor equipment, designing cable harness looms and validating alternate components to meet RoHS/REACH compliance.

I engineered Airborne Sonar Winch Cable Harnesses, successfully passing rigorous vibration and environmental tests for defense applications.

Additionally, I contributed to rail signaling wiring projects, enhancing system reliability and safety.
