

Venkataramu H.D
Hardware Testing Engineer

(+91) 8105794347

Bengaluru, INDIA

venkataramu57@gmail.com

3 Years 4 Months of experience

PROFILE SUMMARY

Experienced hardware professional with 4 years in hardware testing and design, specializing in embedded systems and RF testing and design. Proficient in developing, testing, and troubleshooting hardware components to ensure optimal performance and reliability. Skilled in embedded system design, hardware validation, and radio frequency (RF) testing methodologies. Seeking challenging opportunities in the hardware sector to leverage technical expertise and contribute to innovative projects. Strong analytical and problem-solving abilities with a commitment to quality and continuous improvement.

WORK EXPERIENCE

Hardware Testing Engineer

Park Controls & Communications pvt ltd
08-2022 - 12-2024

- here I was working as hardware testing engineer and totally I have a 3 years experience
- I was testing a airborne and defense products like ITS- 100 ADANI, NGARM and astra
- Expertise about hardware testing, design, embedded testing, design, RF testing and design etc
- Experienced in communication protocols like RS232, RS422, RS485, I2C, UART etc
- Experienced in pcb troubleshooting, clint interaction , schematics reading and report preparation
- Expertise in embedded hardware and software testing
- Experienced in software tools like unidaps, nios, x-das, x-config and quatrus
- Expertise in microcontroller, microprocessor, verification and validation
- Experienced in autocad, altium and cadstar
- Expertise in PLC SCADA and automation testing

KEY SKILLS

- Microcontroller
- Embedded Development
- Python
- c programming
- html
- css
- Javascript
- Marketing Communication
- ms office
- MS EXCEL
- Embedded Testing
- Hardware debugging
- Pcb troubleshooting
- RF Testing
- UART
- Emission Testing
- EMI/EMC testing
- PLC automation
- Web Development
- Communication Protocols
- Firmware Testing
- PLC
- SCADA
- Automation
- Chamber testing
- Schematic review
- Arduino IDE
- Quartus
- Technical Documentation
- PCB Layout
- Equipment Testing
- Environmental Stress Screening
- Cots
- Vivado
- Visual dsp
- FPGA
- Telemetry

PROJECTS

Solar panel based automatic handwash system 6 Months

- Developed and implemented a Solar Panel based Automatic Handwash System, resulting in a 40% reduction in energy consumption.
- Spearheaded the design and construction of a Solar Panel Based Automatic Handwash System, leading to a 30% increase in operational efficiency.

- Familiarised in ground telemetry system and concepts
- Experienced in EMI EMC testing like RS103 test, CE102, RE102 etc
- Experienced in board level screening and Acceptance test procedures
- Expertise in power supply testing, altitude testing, random vibration testing, CATH test, etc
- Expertise in internet of things technology
- Experienced in different types of microcontrollers like PIC microcontroller
- Expertise in integrated telemetry system concepts and components selection

Senior Test Engineer

Mistral solutions pvt ltd

02-2025 - Present

Currently I am working in a mistral solutions pvt ltd as a senior test engineer

INTERNSHIP

Avalontechnology

28 Days

EDUCATION

B.Tech/B.E. - Electrical

2022

ATME COLLEGE OF ENGINEERING MYSORE

Grade - 8.5/10

- Researched, analyzed, and integrated cutting-edge technologies for a Solar Panel Based Automatic Handwash System, enhancing system performance by 25%.

ITS-100 NGARM

6 Months

I have done this project in park control and communication company

ITS-100 Astra

8 Months

I have done this project in park control and communication pvt ltd this is completely based on telemetry project where we can monitor all parameters from ground system

ERP SRK

24 Months

Currently I am doing ERP SRK project in mistral solutions these project is completely based on aircraft system
