anshuman.parua@outlook.com

Professional Summary

Electronics and Communication engineer with an MTech degree from IIT Guwahati. More than 16 years of industry experience in software application development with a vision to contribute to technical research through continuous learning, self enhancement and team spirit while working in a challenging atmosphere.

Result-driven Technical Architect with over 8 years of success in conceptualizing technical solutions and system development environments. Focused on working closely with clients to determine technical project objectives, specifications and solutions. Detail-oriented in coding and testing the functionality of deliverables, and pitching for next-gen in house products as a Solutions Architect in recent endeavors.

Achievements include Director's Letter of Appreciation for 3D TV Imaging Gap Benchmarking in Samsung R&D Center Delhi in 2014 and Internal Certificate for successfully developing and incorporating the Ghost Object Detection in Front RADAR application for European OEM as part of Continental Automotives in 2017

Pursuing full-time role that presents professional challenges and leverages interpersonal skills, effective time management, and problem-solving expertise

Core Competencies

- Automotive ADAS Software Development
- System Software Architecture Modelling
- Software Requirements Engineering
- Functional safety analysis & DRBFM
- Automotive RADAR Feature Development
- ADAS Function Development (RCTA/B)
- Proof of Concepts Design and Development

Skills

- Software Application Architecture
- Presales Technical Solutioning
- Adapting AIML techniques in SRE and CSS
- ADAS RADAR Perception and Object Detection
- Active Safety Function Prototyping
- ADAS Algorithm Optimization
- 3D Imaging Analysis, Computer Simulations

Professional Experience

Technical Architect

Quest Global Engineering Services, Pvt Ltd.

03/2024 - Current

Bangalore, India

- Mar'24 - Apr'24: Automotive RADAR Capability Pitching and Proof of Concepts Development
- May'24 - Jul'24: Technical Safety Documentation Review and Proposal Review of Automotive RADAR Application Projects
- Aug'24 - Mar'25: Technical Consultant for RADAR Sensor based Proof of Concepts Design, Issue Analysis, Bench and Field Testing of Integrated ADAS Functions in Internal Autonomous Vehicle Program.
- Apr'25-Jun'25: Solution Architect / Technical Consultant for Vehicle System Modelling and Automotive Embedded Software
- Jul'25- Present: Technical Solutions Architect/Manager for new Automotive Business (focusing on Indian Markets for Commercial Vehicles Regulations) and Embedded RADAR Sensor Development and Solution Capability RFI Response Creation.

Technical Architect

Wipro Technologies Limited

03/2018 - 02/2024

Bangalore, India

- Mar'18-Aug'18: Solution Architect for ADAS Applications - 6 months
- Sep'18-Nov'19: Product owner /Technical Team Manager (7 members) for Diagnostics Module for Android Automotive Application Development - 15 months
- Dec'19-Feb'20: Presales Solution Architect for ADAS Application Testing Framework - 3 months
- Mar'20-Apr'20: Technical Lead of 3-member team for Xilinx Board Bring up for ROS Applications and ROS-2 node Validation Toolchain - 2 months

- May'20-Jul'20: Solution Architect for cybersecurity requirements, design for SAE level-2 Auto Parking Functions - 3 months
- Aug'20-Sep'20: Presales Solution Architect for Design of LiDAR Data Simulation and Ingestion Framework - 2 months
- Oct'20-May'23: System Architect and Body Electronics Product Architect, (Requirements Engineering and Functional Safety) - Total 32 months including (Automotive Consultant for ADAS, BODY Domain for LATAM region Automotive Tier-1 - 1 year)
- Jun'23- Sep'23: Solution Architect for ADAS Communication Framework (L2- level Auto Parking Function) - 4 months
- Oct'23 - Dec'24: Proof of Concepts Development / Scoping / Functional Integration Strategies for Autonomous Driving Next Gen Technologies as part of ADAS/AD Practice and CoC (Automotive RADAR Applications) - 3 months
- Jan'24- Feb'24: Competency building for Automotive Projects.

Technical Lead - Image Processing

09/2017 - 02/2018

BioMedix Optotechnik & Devices Pvt. Ltd

Bangalore, India

- Worked in Development and Integration of Machine Vision Algorithms for Optical Coherence Tomography - 5 months

Module Lead / Component Owner

09/2016 - 08/2017

Continental Automotives Pvt. Ltd

Bangalore, India

- Development of New Algorithm for Multipath Reflection related False Alarm Rejection for High-Speed Auto-Bahn Conditions
- Application Design and Modelling for Sys-SW Integration in SIM and ReSIM for RADAR Sensors
- Mar'2017: Internal Recognition for Successful SIM Deployment of CFAR Reject Algorithm
- OEM: Daimler
- Onsite Assignment: Lindau Germany

Module Lead - ADAS RADAR Applications

02/2016 - 08/2016

Continental Automotives Pvt. Ltd

Bangalore, India

- Deputed as Consultant for Japan Segment ADAS Sensorics Function Delivery Owner for Cross Traffic Alert 3rd and 4th Gen RADAR
- Technical Lead for Development of Alignment and RADAR Plausibility Checks
- Jun'2016: Internal Recognition for Plausibility Detection for Azim, ROI Enabler for Sensitivity
- OEM: Mitsubishi & Subaru
- Onsite Assignment: Yokohama, JP

Lead Engineer - DTV & Imaging Applications

07/2013 - 02/2016

Samsung Research Institute - Delhi

Noida, India

- Worked in Development of Camera Modules for DTV (for the TIZEN Platform) at SRI-Delhi - 10 months
- Worked in Backend Evaluation Tool (BET) for Resolution and 3D television at HQ, South Korea - 5 months
- Worked in Improvement and Optimization of BET at SRI-Delhi -7 months
- Worked in developing model and integration of Single Image Super resolution PoC in DTV Imaging at SRI-Delhi and IIT Delhi (9 months)
- Dec'2014: Internal Recognition (Director's Appreciation) for 3D Picture Analysis Tool

Senior Software Engineer

05/2012 - 07/2013

iGATE Computer Systems Ltd

Pune, India

- Led Development and restructuring PET Raw Data Tool
- Led debugging efforts to identify and resolve critical issues in software applications, ensuring timely delivery.
- Engaged in regular troubleshooting sessions, enhancing problem-solving skills across the development team.

Software Engineer

01/2010 - 04/2012

Patni Computer Systems Ltd

Pune, India

- Worked on development of Respiratory Gating Reconstruction for PET Images

- Worked on Enhancement of an Image Quality Check tool to be integrated into the new Toshiba CT-PET Scanner
- Developed Front-end Compression Algorithm for Medical Images
- Trained in Implementing Visual C++ based Graphical UI Design for Medical Systems
- Developed automated test scripts to improve testing efficiency and reduce manual efforts for MATLAB Auto coder

Teaching Assistant

IIT Guwahati ECE Dept

08/2007 - 03/2009
Guwahati, India

- Assisted in the preparation and organization of educational resources for classroom activities.
- Supported teachers in implementing lesson plans and adapting materials for diverse learning needs.

Software Developer

Infosys Technologies Ltd

11/2006 - 07/2007
Bangalore, India

- Completed CMM Level 5 Software Development training in C and C++.
- Contributed to FOS Field of States development, focusing on communication systems.

Education

M. Tech: Indian Institute of Technology Guwahati - Electronics and Communication Technology, Digital Signal Processing 05/2009
Guwahati, India

- M. Tech thesis on Online Speech Recognition for Medical Transcription
- GPA: CGPA - 7.67/10

Bachelor of Engineering: Visvesvaraya Technological University (R.V. College of Engineering) - Electronics and Communication Engineering 07/2006
Bangalore, India

- First Class with Distinction
- GPA: 74%

12 Standard (ISC): St. Joseph's College - English, Computer Science 06/2001
Allahabad, India

- First Class with Distinction
- A+ grade in Computer Science and English
- GPA: 83.6%

10 Standard (ICSE): St. Joseph's College - Social Studies, Mathematics 06/1999
Allahabad, India

- First Class with Distinction
- A+ grade in Mathematics
- GPA: 77.6%

Certifications & Licenses

LinkedIn Learning:
