Visakhapatnam, A.P., India

Professional Skills:**Ensure/Hands on**

Maintenance, trouble shooting, testing and repair of Electrical/Electronic/Instrumentation/communication equipment and repair of All related PCBs

PCB repair, soldering, de-soldering, tracing, reverse engineering, circuit development

Planning, procurement, Stores and contracts

PLC programming

SQC tools & techniques

Skill development Training and Faculty

Verbal and Written communication

**P S MANIKYALARAO**

RINL Work Experience: 31 years (From 1993 - March 2025)

Former Dy. General Manager (DGM)

Electro technical Dept, Visakhapatnam Steel Plant, RINL.

Visakhapatnam, India

- **1. Electrical/Electronic/Instrumentation and communication Equipment Maintenance :** Ensured 100% availability of electronic and communication equipment in continuous production units at RINL by carrying out inspection, preventive, predictive, and breakdown maintenance. Handled troubleshooting, modification, and upgradation of Electronic and communication systems, including AC/DC digital drives (VFD/VVFD), MV Drives, PLCs, EOT cranes, UPS, CNC, DG, HVAC / ESP / Environmental pollution control systems, Data center, Cooling Systems, Solar power equipment, battery chargers, wireless and other communication equipment and Projects.
- **2. Electronic and communication Laboratory Operations & PCB Support :** Managed PCB spare support for equipment at RINL by performing maintenance, testing, repair, rework, soldering/de-soldering, and simulation of site conditions. Handled modification, indigenization, tracing and reverse engineering of all types of electronic and communication PCBs. Developed circuit drawings, test procedures and documentation. Conducted calibration of sensors and instruments, provided technical training and guidance to subordinates, and ensured quality checks from incoming components to finished PCBs.
- **3. Planning & Contract Management:** Strategic planning for procurement and budget preparation, with focus on equipment criticality, spare part cost, consumption rate, and PCB repairability. Managed spares support from OEMs, ensured PR and TR as per specifications, and carried out quality assurance of procured electronic components and PCBs. Handled Technical proposals, price negotiations, inventory control, stores management, and contract management through ERP systems.
- **4. Continuous Improvement & Compliance:** Ensuring Technical, administration, reviews, report generations, ISO (QMS, OHSMS, EMS), Skill development Training to the Students as well as Employees, Faculty development, Safety, 5S, Suggestions, QCs and safety, housekeeping, safe healthy work environment.
- **5. Savings :** Successful repair of 24 no. of ABB PM864 CPU resulted savings of Rs.12 crores, Indignation of Hitachi make synchronous 6.6MW brush-less excitation system drive control card Savings of 5 crores, Modification of power circuit in ABB MOCON ROBUST DCB202, revival of SIEMENS PCU50 controllers, Revival of IGBT driver controllers saved 4 Crores. Implemented 3R principle for E-waste and saved Rs.80 lakhs by salvaging components. Electronic laboratories average savings of Rs.2 crores per annum for the past 10 years.

Languages known:

English

Hindi

Telugu

Academics:

B.E(Electronics& Communication engineering)

Duration: 1989-1993

AU college of Engineering

Andhra University,
Visakhapatnam, AP

DECE(ECE): 1984-1987

SVL Poly technic ,
Machilipatnam,AP

Voluntary activities:

Road safety campaign,
Plantation and blood
donation.

- **MACE (Previous) work experience: 4 years (1988-1992):** Before joining RINL, I worked at Marine and Communication Electronics (**MACE**), a Government of Andhra Pradesh organization. I gained experience in production, testing, R&D, quality assurance, training, and customer coordination. I worked with HF, VHF wireless communication equipment used by the Indian Army, Air Force, Navy, AP Forest Department, and AP Police Department. My technical exposure includes HF,VHF wireless sets, MF beacons, and radar systems.
- **Projects and Coordination :** Contributed to power electronics product lifecycle activities, including fault diagnosis, repair, testing, and validation, ensuring high reliability of systems. Collaborated with multidisciplinary teams to support solar inverter and industrial automation projects,Green power capital projects enhancing operational efficiency. Supported supply chain coordination through vendor follow-ups and component readiness, minimizing downtime and delays. Drove continuous improvement by modular solutions,Fabricated projects,resolving recurring technical issues,Training and optimizing system performance.

Other Details:

Software application skills:

- MS Excel, Word ,Power point, Easy EDA,Tiny CAD,Simplicity, ERP/SAP (user), PLC Prog,CRM tools, IMS(Inventory Management Systems).

Achievements in RINL:

- Prestigious **JN award (Jawaharlal Nehru)** for outstanding performance for a period of 10 years, **Silver medal** for revival of Snorkel make 50 met height operated hydraulic Fire engine balance control equipment. **Ten Special performance** awards, **Nine Employee instantaneous recognition** awards and commendations for achievements in RINL.
