

ARUN P.A

Senior Staff -Hardware Design

+91 9538319206 @ kannan696@gmail.com Bangalore-560103

SUMMARY

Highly skilled Hardware Architect specialized in High Speed Hardware Design with over 16 years of experience in Hardware product design, high-speed board design, people management, project management, and testing. My work encompasses architecture design, schematics, reviews and validation within industry-leading companies like SanDisk. I am passionate about electronics and thrive on tackling complex challenges in hardware design and development.

EXPERIENCE

Senior Staff-Hardware Design

Netradyne 01/2026 - Present Bangalore

Company focused on AI based camera solutions for vehicle safety

- Managing a team of 5 members
- NPI and EMS co-ordinations
- Reviewing schematics and layout
- Defining product testing strategies

Technologist-Hardware Design

SanDisk® 10/2018 - 01/2026 Bangalore

Company focused on data storage solutions

- Managing Hardware Design team of 4 members
- Designed Hardware Architecture of PCIe based Production and Qualification ATEs for raw NAND, USB etc.
- Handled end-to-end design development and manufacturing of internal Test Equipment (ATE)
- Cross functional working with SI & PI and mechanical team
- SI,PI, Mechanical reviews
- Program management for multiple projects from POC to deployment stage
- Schematic design using Orcad and Concept HDL, schematics and Layout reviews, SI PI review, component selection and BOM
- Supported manufacturing, board bring-up, and fixing field issues
- Cross functional leadership to bring in complete system

Sr. Hardware Design Engineer

Altran Technologies 07/2015 - 10/2018 Bangalore

A global engineering services company

- Designed hardware solutions for clients in electronics sectors like AMD, Qualcomm.
- Schematics design, layout review
- Designed PCIe based add-on card for AMD motherboard platforms
- Led design team of 6 members

Hardware Design Engineer

CG-ZIV Power Automation Ltd 10/2013 - 07/2015 Bangalore

Specializes in power automation and control solutions

- Developed boards and schematics for power automation systems

Hardware Design Engineer

Wipro Technologies 12/2009 - 10/2013 Bangalore

One of India's leading technology services and consulting firms

- Worked on hardware design projects and provided engineering solutions
- Designed Intel based blade servers
- Contributed to different hardware testing protocols
- Worked on high speed interfaces, schematics and BOM

STRENGTHS

-  **High Speed Board Design Expertise**
Hands-on experience in architecture and all areas of high speed board design including people management, project management and testing
-  **Handled Technical and Management role**
Worked as an individual contributor as well as in program and people management role
-  **Proactive Learner**
Positive attitude to take initiatives at work and learn new technologies

SKILLS

-  **Tools**
OrCAD
Cadence Allegro
LT Spice
Constraints manager
-  **High Speed Interfaces**
PCIe (Gen3, Gen4, Gen5)
DDR 2/3, NAND,USB
-  **Interfaces**
I2C, SPI, UART
-  **Analysis**
Signal Integrity review
Power Integrity review
Layout review
Schematics review
-  **Management**
People management
EMS vendors management
Program management
Procurement
Manufacturing support
-  **Hardware Testing**
Oscilloscope, Signal generators, Protocol analyzers
Test plan preparation
Board bring-up and testing
EMI/EMC and environmental testing
Debugging
-  **Programming Languages**
Verilog Basics

ACHIEVEMENTS

-  **Point of Contact for Test Equipment HW Design in SanDisk India**
Working as a single POC for Test Equipment Hardware Design and Manufacturing in SanDisk India Site

PROJECTS

Production and Qual Testers for NAND (CNE,CST)

- Architecture Design
- Developed PCIe based architecture for multiple tester platforms in automotive grade
 - Reduced test time and cost for testers by developing high speed testers
 - Deployed 200+testers across different geographies
 - Schematics, Layout, BOM, SI & PI Reviews
 - Program management
 - Leadership role
 - Test plan preparation, Board Bring-up and testing

Tachyon

- Architecture Deign
- Design and developed high speed boards to test NAND memories for Apple

ASTRA NT

- Architecture Design
- Developed PCIe Based high speed platform for NAND FA analysis

PCIe Add-on cards for AMD Platforms

- High Speed Board Design
- Schematics Design of PCIe based add on card for AMD motherboards

INCA Blade servers

- Schematics Design
- Designed blade server mother boards based in Intel chipsets

EDUCATION

B. Tech in Electronics and Communication

M.G University  08/2004 - 05/2008  Kottayam, Kerala

LANGUAGES

English Proficient ●●●●● Malayalam Native ●●●●●

Hindi Intermediate ●●●●●

ACHIEVEMENTS

-  **Best Performer Award - Wipro**
Recognized for best performer award at Wipro for excellence in design and debugging in INCA server
-  **Best Performer Award - Altran**
Awarded for successful development of 5 variants of PCIe add-in cards at Altran
-  **Accomplishment in Higher Secondary Examination**
State level first rank holder in Kerala State Vocational Higher Secondary Examination 2004 in Electronics

PATENTS AND INNOVATIONS

-  **Patent filed for Multi Edge Card Edge PCB design**
-  **Recognized with innovation award for developing heater socket and PCB for testing NAND at high temperature**
